WORK EXPERIENCE

Frontend Developer
Hamoye Technologies Inc
05/2022 - Present
Achievements/Tasks
- Developed robust applications for AI lab projects helping businesses leverage on data engineering.
- Resolved issues on the frontend of a Content Management System Application for an affiliate company to get the website to production within the target deadline.
- Carried out robust research on user experience for application prototypes.

Freelance Frontend Developer
Freelance
06/2021 - 05/2022
Achievements/Tasks
- Worked with enterprises and organizations to provide diverse applications with different use cases.
- Collaborated effectively in brainstorming sessions and quick fixes.
- Developed websites with React JS, EJS, WordPress while producing interfaces as amazing copies of design files.

PROJECTS

ICEECE Conference Management Application
- An application developed for the ICEECE conference held at the university of Ibadan.
- Was developed to handle attendees registration, process conference schedule and speakers details.
- The application was developed with a custom theme EJS, and Node JS for the backend.

MSSN Website
- The organization's website developed to show up to date information about the organization and upcoming events.
- Built with robust design files and design systems.
- Developed with HTML, CSS and JavaScript.

Wordly (https://wordly-world.netlify.app/)
- A dictionary app to check unique words and their definitions upon loading the app and by searching.
- Implemented custom autocomplete with data fetched from an API endpoint.
- Created reusable components and maintained a readable codebase.

Space Tourism Website (https://space-tourism-reed.netlify.app/)
- Developed the project to excellently resemble the Figma designs with React Js and styled with SCSS .
- Fetched data and passed state across all components with Context API.
- Created a fully responsive design (mobile first) with dynamically rendering images.

Countries Details App (https://mern-countries-reed.netlify.app)
- An application to quickly visit to check up basic details about different countries of the world.
- Implemented the project with Express, React js, Node Js, CSS, and Git and automatically deployed to netlify. Backend at https://reed-countries-api.herokuapp.com.
- Implemented important features for user accessibility and experience.

Portfolio website (https://reed-projects-portfolio.netlify.app/) (05/2021 - 10/2021)
- An online portfolio showcasing my development journey and my projects.
- Developed for mobile-first.
- Built with HTML, CSS and Javascript.
